

Public consultation on the review of the alternative investment fund managers directive (AIFMD)

Fields marked with * are mandatory.

Introduction

The **short version** of this consultation is now available in **23 European Union official languages**.

Please use the language selector at the top of this page to choose your language for this consultation.

In the European Union, alternative investment funds (AIFs) are collective investment funds that are not covered by [Directive 2009/65/EC on undertakings for collective investment in transferable securities \(UCITS\)](#). AIFs vary in terms of their investment strategies, markets, asset types and legal forms. Alternative investment fund managers (AIFMs) manage the AIFs, which are often established for saving or income generating purposes while supporting broader economic activity, and include venture capital and private equity funds, real estate funds, hedge funds and fund of funds. The activities of AIFMs are governed by the [alternative investment fund managers Directive 2011/61/EU \(AIFMD\)](#).

The AIFMD aims to facilitate greater AIF market integration, improve coherence in the actions taken by supervisory authorities to address potential risks posed to the financial system while ensuring appropriate levels of investor protection. To this end, an AIFM is required to obtain licence from its home supervisor and adhere to the operational requirements laid down in the AIFMD and its supplementing [AIFMR](#), including taking measures to manage risks and to ensure the requisite transparency regarding the activities of their managed AIFs.

On 10 June 2020, the European Commission submitted its [report to the European Parliament and the Council on the scope and the application of the AIFMD](#). The report concludes that while the AIFMD has contributed to the creation of the EU AIF market, provided a high-level protection to investors and facilitated monitoring of risks to financial stability, there are a number of areas where the legal framework could be improved. Given the European Commission's ongoing efforts to develop the capital markets union (CMU), this consultation seeks the views of stakeholders on how to achieve a more effective and efficient functioning of the EU AIF market as part of the overall financial system.

Structure of the public consultation

First, this public consultation focuses on improving the utility of the AIFM passport and the overall competitiveness of the EU AIF industry. The analysed data indicates that the appropriate and balanced regulation of financial markets

benefits investors as well as the overall economy. The questions in the section on **authorisation/scope** seek views from stakeholders on the scope of the AIFM licence, its potential extension to smaller AIFMs and level playing field concerns in relation to the regulation of other financial intermediaries, like MiFID firms, credit institutions or UCITS managers that provide similar services.

The **investor protection** section raises questions on investor access that take into account the differences between retail and professional investors. The same consideration is raised in the questions on a potential EU law pre-calibration of an AIF that would be suitable for marketing to retail. Adequacy of disclosure requirements are covered including the specific requirements that could be added, changed or removed from the current rulebook. Other questions address the alleged ambiguities in the depositary regime and the lack of the depositary passport. Stakeholders are also invited to comment on potential improvements to the AIFMD rules on valuation.

The issue of a level playing field is also covered in the section dedicated to **international issues**. Views are sought on how best to achieve the equitable treatment of non-EU AIFs and securing a wider choice of AIFs for investors while at the same time ensuring that EU AIFMs are not exposed to unfair competition or are otherwise disadvantaged.

The section dedicated to **financial stability** seeks stakeholder views on how to ensure NCAs and AIFMs have the tools necessary to effectively mitigate and deal with systemic risks. Specific input regarding improvements to the supervisory reporting template provided in the AIFMR is requested with a particular focus on the increased activities of AIFs in the credit market. The consultation suggests the potential for more centralised supervisory reporting and improved information sharing among the relevant supervisors. A revised supervisory setup and cooperation measures among the competent authorities are another focus of this consultation.

The rules on **investment in private companies** are examined with a view to potential improvements and comments are sought on the effectiveness of the current rules and their potential enhancement.

The **sustainability** related section seeks input on how the alternative investment sector can participate effectively in the areas of responsible investing and the preservation of our planet.

Questions are posed as regards the treatment of **UCITS**, particularly where a more coherent approach may be warranted. This includes the question of a single licence for AIF and UCITS managers, harmonised metrics for leverage calculation and reporting on the use of liquidity management tools.

Finally, stakeholders are welcome to raise other AIFMD related issues and submit proposals on how to otherwise improve the AIFMD legal framework with regard to any issues not directly addressed in the consultation.

Given the broad nature of the questions, well-substantiated, evidence/data backed answers and proposals will be particularly instructive. Clearly linking responses to the contributions already received in the [public consultation reviewing MiFID II](#), informing digital strategy of the EU or any other relevant consultations would be particularly useful.

This public consultation aims to gather views from all interested parties, in particular collective investment fund managers and investment firms, AIF distributors, industry representatives, investors and investor protection associations. The questions 1, 2 and 3 as well as the section Investor protection, except for part (b) thereof, are available in all the EU official languages to gather citizens' views on these matters.

The consultation will be open for fourteen weeks.

Please note: In order to ensure a fair and transparent consultation process **only responses received through our online questionnaire will be taken into account** and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact fisma-aifmd-public-consultation@ec.europa.eu.

More information on

Public

Your personal details (name, organisation name and size, transparency register number, country of origin) will be published with your contribution.

I agree with the [personal data protection provisions](#)

Choose your questionnaire

Please indicate whether you wish to respond to the citizens' version (3 general questions and 14 investor protection questions) or full version (102 questions) of the questionnaire.

The short version only covers the general aspects of the AIFMD regime and investor protection matters under the AIFMD.

The full version contains 85 additional questions addressing more technical features of the AIFMD regulatory regime.

Note that only the questions that are part of the short version are also available in all EU languages.

- I want to respond only to the **short version of the questionnaire** (3 + 14 questions)
- I want to respond to the **full version of the questionnaire** (102 questions)

I. Functioning of the AIFMD regulatory framework, scope and authorisation requirements

The central pillar of the AIFMD regulatory regime is a European licence or a so-called AIFM passport. EU AIFMs are able to manage and market EU AIFs to professional investors across the Union with a single authorisation. This section seeks to gather views on potential improvements to the AIFMD legal framework to facilitate further integration of the EU AIF market. The objective is to look at the specific regulatory aspects where their potential refining could enhance utility of the AIFM passport, gathering data on concrete costs and benefits of the suggested improvements, at the same time ensuring that the investor and financial stability interests are served in the best way. A number of questions focus on the level playing field between AIFMs and other financial intermediaries.

Question 1. What is your overall experience with the functioning of the AIFMD legal framework?

- Very satisfied
- Satisfied
- Neutral
- Unsatisfied
- Very unsatisfied
- Don't know / no opinion / not relevant

Question 2. Do you believe that the effectiveness of the AIFMD is impaired by national legislation or existing market practices?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 2.1 Please explain your answer to question 2, providing concrete examples and data to substantiate it:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not believe there is a need to open up the Directive itself for significant revision. However, we do think that the gold plating that has occurred at a local level, where it adds further requirements and costs, does not encourage cross-border marketing. The provision of guidance and fine tuning at Level 2 or 3 should be considered to address this issue.

Question 3. Please specify to what extent you agree with the statements below:

The AIFMD has been successful in achieving its objectives as follows:

	1 (fully disagree)	2 (somewhat disagree)	3 (neutral)	4 (somewhat agree)	5 (fully agree)	Don't know - No opinion - Not applicable
creating internal market for AIFs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
enabling monitoring risks to the financial stability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
providing high level investor protection	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

Other statements:

	1 (fully disagree)	2 (somewhat disagree)	3 (neutral)	4 (somewhat agree)	5 (fully agree)	Don't know - No opinion - Not applicable
The scope of the AIFM license is clear and appropriate	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
The AIFMD costs and benefits are balanced (in particular regarding the regulatory and administrative burden)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The different components of the AIFMD legal framework operate well together to achieve the AIFMD objectives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
The AIFMD objectives correspond to the needs and problems in EU asset management and financial markets	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
The AIFMD has provided EU AIFs and AIFMs added Value	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question 3.1 Please explain your answer to question 3, providing quantitative and qualitative reasons to substantiate it:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 4. Is the coverage of the AIFM licence appropriate?

- Yes
- No
- Don't know / no opinion / not relevant

Question 5. Should AIFMs be permitted to invest on own account?

- Yes
- No
- Don't know / no opinion / not relevant

Question 5.1 If yes, what methods and limitations to this possibility should be imposed?

Please explain your proposition in terms of conflicts of interest, benefits and disadvantages as well as costs, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The ability of AIFM's to invest in their own funds should remain as it achieves alignment of interest with investors in the fund and no limitations on this should be imposed.

The requirements in Article 18 ensure there are safeguards in place to ensure AIFMs investing on their own account are not receiving better terms than other investors. Contractual terms and industry best practice codes already address any potential conflicts of interest and ensure that investors are aware that the AIFM can invest in the fund.

Question 6. Are securitisation vehicles effectively excluded from the scope of the AIFMD?

- Yes
- No
- Don't know / no opinion / not relevant

Question 7. Is the AIFMD provision providing that it does not apply to employee participation schemes or employee savings schemes effective?

- Yes
- No
- Don't know / no opinion / not relevant

Question 8. Should the AIFM capital requirements be made more risk-sensitive and proportionate to the risk-profile of the managed AIFs?

- Yes
- No
- Don't know / no opinion / not relevant

Question 9. Are the own funds requirements of the AIFMD appropriate given the existing initial capital limit of EUR 10 million although not less than one quarter of the preceding year's fixed overheads?

- Yes
- No
- Don't know / no opinion / not relevant

Question 10. Would the AIFMD benefit from further clarification or harmonisation of the requirements concerning AIFM authorisation to provide ancillary services under Article 6 of the AIFMD?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 10.1 Please explain your answer to question 10, presenting benefits and disadvantages of the entertained options as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The current ESMA guidance in this area is sufficient and no further clarification is required.

Question 11. Should the capital requirements for AIFMs authorised to carry out ancillary services under Article 6 of the AIFMD be calculated in a more risk-sensitive manner?

- Yes
- No
- Don't know / no opinion / not relevant

Question 12. Should the capital requirements established for AIFMs carrying out ancillary services under Article 6 of the AIFMD correspond to the capital requirements applicable to the investment firms carrying out identical services?

- Yes
- No
- Don't know / no opinion / not relevant

Question 12.1 Please explain your answer to question 12, presenting benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not think it is necessary to align the capital requirements for AIFMs carrying out ancillary services under Article 6 of AIFMD to the capital requirements applicable to the investment firms carrying out identical services.

Question 13. What are the changes to the AIFMD legal framework needed to ensure a level playing field between investment firms and AIFMs providing competing services?

Please present benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not think that any changes are required to the AIFMD legal framework to ensure a level playing field between investment firms and AIFMs providing competing services.

Question 14. Would you see value in introducing in the AIFMD a Supervisory Review and Evaluation Process (SREP) similar to that applicable to the credit institutions?

- Yes
- No
-

Don't know / no opinion / not relevant

Question 14.1 Please explain your answer to question 14, presenting benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The risk to market, client, and firm of an AIFM do not correspond to the risks that are applicable for credit institutions. Therefore, we see no value in introducing a Supervisory Review and Evaluation Process (SREP) in AIFMD similar to that applicable to the credit institutions.

Question 15. Is a professional indemnity insurance option available under the AIFMD useful?

- Yes
- No
- Don't know / no opinion / not relevant

Question 15.1 Please explain your answer to question 15, presenting benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 16. Are the assets under management thresholds laid down in Article 3 of the AIFMD appropriate?

- Yes
- No

- Don't know / no opinion / not relevant

Question 17. Does the lack of an EU passport for the sub-threshold AIFMs impede capital raising in other Member States?

- Yes
- No
- Don't know / no opinion / not relevant

Question 17.1 Please further detail your answer to question 17, substantiating it, also with examples of the alleged barriers:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Small fund managers wishing to market their funds outside their home state have to weigh up the costs and benefits of opting into AIFMD or using alternate marketing solutions such as NPPRs. Reducing the cost of AIFMD regulatory compliance may be an effective way to encourage opt-in by sub-threshold AIFMs and would give them access to an AIFMD marketing passport.

Question 18. Is it necessary to provide an EU level passport for sub-threshold AIFMs?

- Yes
- No
- Don't know / no opinion / not relevant

Question 18.1 Please explain your answer to question 18:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not believe that there is any benefit in the regulation for sub-threshold AIFMs to differ from the regulation for full-scope AIFMS under AIFMD.

Question 19. What are the reasons for EuVECA managers to opt in the AIFMD regime instead of accessing investors across the EU with the EuVECA label?

Please explain your answer:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Not relevant for real estate funds.

Question 20. Can the AIFM passport be improved to enhance cross-border marketing and investor access?

- Yes
- No
- Don't know / no opinion / not relevant

Question 20.1 If so, what specific measures would you suggest?

Please explain your suggestions, presenting benefits and disadvantages as well as potential costs thereof, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We agree that improvements are required to cross-border marketing but there is no need to make changes to the directive itself in relation to this. The issues should be addressed at Level 2 and 3. We suggest that the EU Commission first allows the cross-border distribution of funds regulation to bed-in before undertaking any further reviews of the cross-border marketing of AIFs.

II. Investor protection

The AIFMD aims to protect investors by requiring AIFMs to act with the requisite transparency before and after investors commit capital to a particular AIF. Conflicts of interest must be managed in the best interest of the investors in the AIF. AIFMs must also ensure that the AIF's assets are valued in accordance with appropriate and consistent valuation procedures established for an each AIF. The AIF assets are then placed in safekeeping with an appointed depositary that also oversees AIF's cash flows and ensures regulatory compliance.

Questions in this section cover the topic of investor categorisation referencing to MiFID II, stopping short of repeating the same questions that have been raised in its [recent public consultation on MiFID II](#), rather inviting comments on the most appropriate way forward. Views are also sought on the conditions that would make it possible to open up the AIF universe to a larger pool of investors while considering their varying degrees of financial literacy and risk awareness. Examples of redundant or insufficient investor disclosures are invited.

Greater clarity on stakeholders' views of the AIFMD rules on depositaries is sought in particular where such rules may require clarification or amending. The introduction of the depositary passport is desirable from an internal market point of view, but stakeholders are invited to propose other potential legal solutions, if any, that could address the issue of the short supply and concentration of depositary services in smaller markets.

a) Investor classification and investor access

Question 21. Do you agree that the AIFMD should cross-refer to the client categories as defined in the MIFID II (Article 4(1)(ag) of the AIFMD)?

- Yes
- No
- Don't know / no opinion / not relevant

Question 21.1 Please explain your answer to question 21:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Definitions or classifications of investors should be aligned across relevant financial services directives. We believe that this could be achieved by making amendments to Level 2 or Level 3 of AIFMD rather than making modifications to Level 1. We would like to see guidance on how to definitions within AIFMD align to the client categories within MiFID II; in particular, the definition of a professional investor and the Annex 4 categories.

Question 22. How AIFM access to retail investors can be improved?

Please give examples where possible and present benefits and disadvantages of your suggested approach as well as potential costs of the change:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We think that access to retail investors by AIFM is better addressed through regulation that sits alongside the AIFMD rather than in the AIFMD itself. One example of this is amending the ELTIF rules, a separate consultation for which is already underway, or through new regulation in parallel with the ELTIF rules. There are a number of Member States that have open-ended real estate regimes for AIFs that can be accessed by retail investors. These have investment power rules and investor protection similar to UCITS, while ensuring the AIFs are subject to suitability and appropriateness requirements. We would suggest this model is used more by Member States to improve access by retail investors to AIFs with strong investor protection and straightforward investment strategies but investing in assets, such as real estate and infrastructure, which are not permitted assets under UCITS. The EU may wish to consider adding such assets to the permitted products that UCITS could invest in.

Question 23. Is there a need to structure an AIF under the EU law that could be marketed to retail investors with a passport?

- Yes
- No
- Don't know / no opinion / not relevant

Question 23.1 If yes, what are the requirements that should be imposed on such AIFs?

Please give examples where possible and present benefits and disadvantages of your suggested approach as well as potential costs of the change:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We question whether this needs to be a new type of vehicle or an improvement to the rules for an existing vehicle. As per our response to Question 22, there are already some AIFs which can be marketed to retail clients, usually having been developed to meet the needs of the local market. Member States should be encouraged to have regulatory frameworks to permit these types of AIFs. To encourage more investment in infrastructure and real estate the ELTIF rules could be amended to enable them to be more useful. Although they can already be marketed to retail investors with a passport, take up has been very limited. A significant barrier to use of ELTIFs has been the lack of clarity around the requirement that investments contribute to achieving an economic or social benefit under the Union's energy, regional and cohesion policies, or indeed if there is any need for this condition.

b) depositary regime

Question 24. What difficulties, if any, the depositaries face in exercising their functions in accordance with the AIFMD?

Please provide your answer by giving concrete examples identifying any barriers and associated costs.

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not know of any difficulties.

Question 25. Is it necessary and appropriate to explicitly define in the AIFMD tri-party collateral management services?

- Yes
- No
- Don't know / no opinion / not relevant

Question 25.1 Please explain your answer to question 25:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 26. Should there be more specific rules for the delegation process, where the assets are in the custody of tri-party collateral managers?

- Yes
- No
- Don't know / no opinion / not relevant

Question 26.1 Please explain your answer to question 26, presenting benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 27. Where AIFMs use tri-party collateral managers' services, which of the aspects should be explicitly regulated by the AIFMD?

Please select as many answers as you like

- the obligation for the asset manager to provide the depositary with the contract it has concluded with the tri-party collateral manager
- the flow of information between the tri-party collateral manager and the depositary
- the frequency at which the tri-party collateral manager should transmit the positions on a fund-by-fund basis to the depositary in order to enable it to record the movements in the financial instruments accounts opened in its books
- no additional rules are necessary, the current regulation is appropriate
- other

Question 28. Are the AIFMD rules on the prime brokers clear?

- Yes
- No
-

Don't know / no opinion / not relevant

Question 29. Where applicable, are there any difficulties faced by depositaries in obtaining the required reporting from prime brokers?

- Yes
- No
- Don't know / no opinion / not relevant

Question 30. What additional measures are necessary at EU level to address the difficulties identified in the response to the preceding question?

Please explain your answer providing concrete examples:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 31. Does the lack of the depositary passport inhibit efficient functioning of the EU AIF market?

- Yes
- No
- Don't know / no opinion / not relevant

Question 31.1 Please explain your answer to question 31:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 32. What would be the potential benefits and risks associated with the introduction of the depositary passport?

Please explain your position, presenting benefits and disadvantages of your suggested approach as well as potential costs of the change, where possible:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 33. What barriers are precluding introducing the depositary passport?

Please explain your position providing concrete examples and evidence, where available, of the existing impediments:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 34. Are there other options that could address the lack of supply of depositary services in smaller markets?

Please explain your position presenting benefits and disadvantages of your suggested approach as well as potential costs of the change:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 35. Should the investor CSDs be treated as delegates of the depositary?

- Yes
- No
- Don't know / no opinion / not relevant

Question 35.1 Please explain your answer to question 35, providing concrete examples and suggesting improvements to the current rules and presenting benefits and disadvantages as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

There should be a level playing field with investor CSDs and other custodial service providers. When not acting as a top tier market CSD, CSDs providing custodial services should not be able to use the CSDR to avoid assuming the liabilities applicable as a delegate of a depository.

c) transparency and conflicts of interest

Question 36. Are the mandatory disclosures under the AIFMD sufficient for investors to make informed investment decisions?

- Yes
- No
- Don't know / no opinion / not relevant

Question 37. What elements of mandatory disclosure requirements, if any, should differ depending on the type of investor?

Please explain your position, presenting benefits and disadvantages of the potential changes as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The mandatory disclosure requirements within AIFMD should be the same for all types of investor. The AIFMD disclosure requirements should remain focused on the needs of institutional investors. Where Member States have decided to opt-in retail funds to the AIFMD regime, they are able to require additional disclosures appropriate for retail investors. Institutional investors can and do require managers to provide all the information that they consider relevant and appropriate to keep them adequately informed, and widely adopted industry standards specifically tailored to the asset classes' unique characteristics ensure this information is reported in a meaningful, consistent and comparable way.

Question 38. Are there any additional disclosures that AIFMs could be obliged to make on an interim basis to the investors other than those required in the annual report?

- Yes
- No

- Don't know / no opinion / not relevant

Question 39. Are the AIFMD rules on conflicts of interest appropriate and proportionate?

- Yes
- No
- Don't know / no opinion / not relevant

d) valuation rules

Question 40. Are the AIFMD rules on valuation appropriate?

- Yes
- No
- Don't know / no opinion / not relevant

Question 40.1 Please explain your answer to question 40, presenting benefits and disadvantages of the potential changes as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

In the main, the AIFMD rules on valuation are appropriate. The only exception to this is Article 19(10), whereby an external valuer has unlimited liability to the AIFM for any losses suffered by the AIFM as a result of the external valuer's negligence or intentional failure to perform its tasks.

In several Member States, "negligence" is interpreted to include relatively minor mistakes, whereas "gross negligence" is used to mean relatively more serious mistakes. In some Member States, real estate valuers refuse to accept the external valuer role for the buildings in real estate fund portfolios. Professional indemnity insurance in these Member States is not available for unlimited liability related to actions deemed less serious

than gross negligence.

External valuers of real estate investments have long been a recognised and well-established means of ensuring that the valuation of property in funds are conducted according to industry standards by qualified, licensed independent third-parties. As a result of AIFMD Article 19(10), many AIFMs across Europe have been

forced to perform the valuation function in-house i.e., operate with internal valuations – rather than independent external valuations. This runs counter to long-established investor protection and good corporate governance practices and adds unnecessary costs.

ESMA acknowledged this issue in their letter regarding the AIFMD review, sent to the EU Commission in August 2020. Although, ESMA prefer for this to be addressed directly in legislation, we think guidance at Level 2 or 3 would suffice. A Level 2 or Level 3 interpretation of Article 19(10) would establish a harmonised scope of coverage of the article across the EU. This could be accomplished by noting that, under Article 19

(10):

“the external valuer is subject to unlimited liability to the AIFM for any losses suffered by the AIFM only from the external valuer’s serious error or intentional failure to perform its tasks.”

Question 41. Should the AIFMD legal framework be improved further given the experience with asset valuation during the recent pandemic?

- Yes
- No
- Don't know / no opinion / not relevant

Question 42. Are the AIFMD rules on valuation clear?

- Yes
- No
- Don't know / no opinion / not relevant

Question 43. Are the AIFMD rules on valuation sufficient?

- Yes
- No
- Don't know / no opinion / not relevant

Question 44. Do you consider that it should be possible in the asset valuation process to combine input from internal and external valuers?

- Yes
- No
- Don't know / no opinion / not relevant

Question 44.1 Please substantiate your answer to question 44, also in terms of benefits, disadvantages and costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Input from both external and internal valuers is required in the asset valuation process. External valuers bring their independent view to the process, along with their expertise and knowledge of the values of similar properties in the market. The AIFM's own internal valuation experts are important in assessing the independent valuations provided by the external valuers.

Question 45. In your experience, which specific aspect(s) trigger liability of a valuer ?

Please provide concrete examples, presenting costs linked to the described occurrence:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Valuers have a duty of care to observe the skill and care of a 'reasonable' valuer in conducting a valuation. They are expected by the courts to achieve the standard of skill and care expected from a reasonable body of the valuer's peers. In the UK, and in some other European countries, valuers, are trained and certified by a recognised body such as the Royal Institution of Chartered Surveyors (RICS). The valuers are expected to follow the recognised body's rules of conduct, code of practice and guidance. Not adhering to these professional standards is the most likely trigger of liability.

Question 46. In your experience, what measures are taken to mitigate/offset the liability of valuers in the jurisdiction of your choice?

Please provide concrete examples, presenting benefits and disadvantages as well as costs of the described approach:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

In the UK, authorised property funds are AIFs that are classified as Non-UCITS Retail Scheme (NURS). Under the FCA's Collective Investment Scheme rules (COLL), the AIFM of a NURS is obliged to appoint a Standing Independent Valuer (SIV) but their liability is capped so they cannot be an external valuer. The FCA believes the SIV is an adviser on property valuations and is not an external valuer as defined in AIFMD. The AIFM has the final say on the property valuations used in the NAV and also takes account of other factors comprised in the NAV above and beyond the property valuations.

To enable the AIFM to meet the external valuer requirements in AIFMD, the AIFM sets up an independent valuation committee, who are separate from the AIFM's portfolio management team, to be the external valuers. The AIFM's liability is not capped. This committee reviews and approves the valuations provided by the SIVs.

It would be more appropriate for the external valuer role to be undertaken by the SIV but, as explained in our response to question 40, due to their liability not being capped in AIFMD valuers will not take this role on in the UK.

To avoid having to make changes at Level 1, we suggest there be guidance on how the rules could be interpreted in Level 1 so that the most appropriate party, the SIV, could be the external valuer with capped liability and the AIFM could take on the unlimited liability as they appoint the SIV and are ultimately responsible for the valuation of the assets held by the fund.

III. International relations

Considering the global nature of financial services, the AIFMD interacts with the third country regulatory regimes. By adopting the AIFMD the EU co-legislators sought to put in place a legal framework for tackling risks emanating from AIF activities that may impact the EU financial stability, market integrity and investor protection. The questions below are seeking views on where to strike the balance of having a functioning, efficient AIF market and ensuring that it operates under the conditions of a fair competition without undermining financial stability. Besides posing general questions on the competitiveness of the EU AIF market, this section seeks views on how the EU market could interact with international partners in the area governed by the AIFMD. The focus is on the appropriateness of the AIFMD third country passport regime and delegation rules.

Question 47. Which elements of the AIFMD regulatory framework support the competitiveness of the EU AIF industry?

Please explain providing concrete examples and referring to data where available:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The clarity, consistency and predictability of the AIFMD requirements support the competitiveness of the EU AIF industry and allow increased comparability between different potential investment opportunities. AIFMD has become a well-known and trusted brand that is attractive to institutional investors globally.

The marketing passport allows European institutional investors to access a broader universe of investment funds which enables them to achieve the returns they need to deliver returns while increasing the diversification, and thereby lowering the risk, of their portfolios. Fund managers, both in and outside the EU, are particularly attracted by the benefits of the passport for marketing and managing EU funds in Europe. If applied as AIFMD intended these allow fund managers to efficiently access the European market after setting up and obtaining authorisation of an EU-domiciled subsidiary that manages and markets EU funds.

Although, we would note that there have been barriers to using passports in some jurisdictions. This should be addressed to increase capital investment within the EU.

Question 48. Which elements of the AIFMD regulatory framework could be altered to enhance competitiveness of the EU AIF industry?

Please explain providing concrete examples and referring to data where available:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The introduction of the third-country passport would significantly enhance the competitiveness of the EU AIF industry. Third-country passports for marketing funds would be especially helpful for EU authorised, supervised and domiciled AIFMs to market non-EU AIFs and would result in more investment opportunities being made efficiently available for European institutional investors.

We support the implementation of third-country passports as AIFMD intended (i.e. without re-opening the directive in this area) and in their absence, we think that national private placement regimes (NPPRs) in the EU should not be eliminated. In fact, NPPRs should be encouraged or even required in the Member States that do not have them, given that their absence presents a barrier to entry for sub-threshold EU AIFMs and hence a violation of free movement of capital freedoms guaranteed in the EU Treaty. Ideally, in the future, marketing under either the AIFMD passport or NPPRs should be allowed, which would enhance the competitiveness of the EU AIF industry.

Question 49. Do you believe that national private placement regimes create an uneven playing field between EU and non-EU AIFMs?

- Yes
- No
- Don't know / no opinion / not relevant

Question 50. Are the delegation rules sufficiently clear to prevent creation of letter-box entities in the EU?

- Yes
- No
- Don't know / no opinion / not relevant

Question 51. Are the delegation rules under the AIFMD/AIFMR appropriate to ensure effective risk management?

- Yes
- No
- Don't know / no opinion / not relevant

Question 52. Should the AIFMD/AIFMR delegation rules, and in particular Article 82 of the Commission Delegated Regulation (EU) No 231/2013, be complemented?

- Yes
- No
- Don't know / no opinion / not relevant

Question 53. Should the AIFMD standards apply regardless of the location of a third party, to which AIFM has delegated the collective portfolio management functions, in order to ensure investor protection and to prevent regulatory arbitrage?

- Yes
- No
- Don't know / no opinion / not relevant

Question 53.1 Please explain your answer to question 53:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The AIFM is wholly and entirely legally responsible for any delegated activity and remains accountable for ensuring compliance with the relevant provisions of the AIFMD and its implementation measures. Therefore, regardless of their location, delegated portfolio management functions, should already be adhering to the relevant provisions within AIFMD. There is no need for any direct requirements for third parties within AIFMD. Instead, the NCAs should be ensuring the AIFMs are complying with the current regulations and undertaking the appropriate supervision of delegated functions.

Question 54. Do you consider that a consistent enforcement of the delegation rules throughout the EU should be improved?

- Yes

- No
- Don't know / no opinion / not relevant

Question 55. Which elements of the AIFMR delegation rules could be applied to UCITS ?

Please explain your position, presenting benefits and disadvantages of the potential changes as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

IV. Financial stability

One of the main objectives of the AIFMD is to enable supervisors to appreciate and mitigate systemic risks building up in financial markets from different sources. To this end, AIFMs are subject to periodic reporting obligations and supervisors are equipped with certain market intervention powers to mitigate negative effects to the financial stability that may arise from the activities on the AIF market.

The section below invites opinions whether the intervention powers and a tool-kit available to the relevant supervisors are sufficient in times of severe market disruptions. Shared views on the adequacy of the AIFMR supervisory reporting template will be important in rethinking the AIFM supervisory reporting obligations. According to the FSB report, markets for leveraged loans and CLOs have grown significantly in recent years exceeding pre-crisis levels ([FSB, Vulnerabilities associated with leveraged loans and collateralised loan obligations \(CLOs\), PLEN/2019/91-REV, 22 November 2019](#)). While most leveraged loans are originated and held by banks, investment funds are also exposed to the leveraged loan and CLO markets. In order to assess risks to the financial stability and regulatory implications associated with leveraged loans and CLOs it would be commendable to continue collecting the relevant data and monitoring the market. The stakeholders are invited to cast their views on the matter.

With particular regard to the loan originating AIFs, suggestions on the optimal harmonisation of the rules that could apply to these collective investment vehicles are welcome. Finally, questions are raised whether leverage calculation methods could benefit from further standardisation of metrics across the AIF market and potentially also across the UCITS for the supervisors to have a complete picture of the level of leverage engaged by the collective investment funds.

a) macroprudential tools

Question 56. Should the AIFMD framework be further enhanced for more effectively addressing macroprudential concerns?

- Yes
- No
- Don't know / no opinion / not relevant

Question 56.1 Please explain your answer to question 56:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

No further enhancement to the AIFMD framework is required in relation to any macroprudential concerns. Although, there would be benefits to be achieved through enhanced guidance from ESMA to ensure greater consistency of interpretation.

Question 57. Is there a need to clarify in the AIFMD that the NCAs' right to require the suspension of the issue, repurchase or redemption of units in the public interest includes financial stability reasons?

- Yes
- No
- Don't know / no opinion / not relevant

Question 57.1 Please explain your answer to question 57, presenting benefits and disadvantages of the potential changes to the existing rules and processes as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 58. Which data fields should be included in a template for NCAs to report relevant and timely data to ESMA during the period of the stressed market conditions?

Please provide your suggestions, presenting benefits and disadvantages of the potential changes as well as costs:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 59. Should AIFMs be required to report to the relevant supervisory authorities when they activate liquidity risk management tools?

- Yes
- No
- Don't know / no opinion / not relevant

Question 59.1 Please explain your answer to question 59, providing costs, benefits and disadvantages of the advocated approach:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not think that funds should be required to report to the relevant supervisory authorities when they activate any liquidity risk management tools.

The NCA should be able to request additional reporting on liquidity management reporting at times when it is appropriate such as stressed markets but to expect this type as part of regular reporting would be disproportionate and creates an additional layer of reporting.

Question 60. Should the AIFMD rules on remuneration be adjusted to provide for the de minimis thresholds?

- Yes
- No
- Don't know / no opinion / not relevant

b) supervisory reporting requirements

Question 61. Are the supervisory reporting requirements as provided in the AIFMD and AIFMR's Annex IV appropriate?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 61.1 Please explain your answer to question 61:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Some of the data requested for AIFMD Annex IV reporting is not appropriate for real estate funds. Ideally, we would like there to be a reporting section just for real estate funds. However, the reporting requirements have proved burdensome and costly to implement and the benefits of any changes to reporting would probably not outweigh the associated costs. The current data reported is extensive and should be sufficient for the NCAs' supervisory requirements.

Question 62. Should the AIFMR supervisory reporting template provide a more comprehensive portfolio breakdown?

- Yes
- No
- Don't know / no opinion / not relevant

Question 63. Should the identification of an AIF with a LEI identifier be mandatory?

- Yes
- No
- Don't know / no opinion / not relevant

Question 63.1 Please explain your answer to question 63, presenting benefits and disadvantages as well as costs associated with introducing such a requirement:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

This move would add additional costs for AIFMs without adding significant value.

Question 64. Should the identification of an AIFM with a LEI identifier be mandatory?

- Yes
- No
- Don't know / no opinion / not relevant

Question 64.1 Please explain your answer to question 64, presenting benefits and disadvantages as well as costs associated with introducing such a requirement:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

This move would add additional costs for AIFMs without adding significant value.

Question 65. Should the use of an LEI identifier for the purposes of identifying the counterparties and issuers of securities in an AIF's portfolio be mandatory for the Annex IV reporting of AIFMR?

- Yes
- No
- Don't know / no opinion / not relevant

Question 65.1 Please explain your answer to question 65, presenting benefits and disadvantages as well as costs associated with introducing such a requirement:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

This move would add additional costs for AIFMs without adding significant value.

Question 66. Does the reporting data adequately cover activities of loan originating AIFs?

- Yes
- No
- Don't know / no opinion / not relevant

Question 66.1 Please explain your answer to question 66:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The data required to be reported by AIFMs to the relevant NCAs are adequate to supervise the activities of loan originating AIFs and therefore that no further data reporting is necessary.

Question 67. Should the supervisory reporting by AIFMs be submitted to a single central authority?

- Yes
- No
- Don't know / no opinion / not relevant

Question 67.1 Please explain your answer to question 67:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 68. Should access to the AIFMD supervisory reporting data be granted to other relevant national and/or EU institutions with responsibilities in the area of financial stability?

- Yes
- No
- Don't know / no opinion / not relevant

Question 68.1 Please explain your answer to question 68:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 69. Does the AIFMR template effectively capture links between financial institutions?

- Yes
- No
- Don't know / no opinion / not relevant

Question 69.1 Please explain your answer to question 69:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 70. Should the fund classification under the AIFMR supervisory reporting template be improved to better identify the type of AIF?

- Yes
- No
- Don't know / no opinion / not relevant

Question 71. What additional data fields should be added to the AIFMR supervisory reporting template to improve capturing risks to financial stability:

Please select as many answers as you like

- value at Risk (VaR)
- additional details used for calculating leverage
- additional details on the liquidity profile of the fund's portfolio
- details on initial margin and variation margin
- the geographical focus expressed in monetary values
- the extent of hedging through long/short positions by an AIFM/AIF expressed as a percentage
- liquidity risk management tools that are available to AIFMs
-

data on non-EU master AIFs that are not marketed into the EU, but which have an EU feeder AIF or a non-EU feeder marketed into the EU if managed by the same AIFM

- the role of external credit ratings in investment mandates
- LEIs of all counterparties to provide detail on exposures
- sustainability-related data, in particular on exposure to climate and environmental risks, including physical and transition risks (e.g. shares of assets for which sustainability risks are assessed; types and magnitudes of risks; forward-looking, scenario-based data)
- other

Question 72. What additional data fields should be added to the AIFMR supervisory reporting template to better capture AIF's exposure to leveraged loans and CLO market?

Please explain your answer providing as much detail as possible and relevant examples as well as the costs, benefits and disadvantages:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 73. Should any data fields be deleted from the AIFMR supervisory reporting template?

- Yes
- No
- Don't know / no opinion / not relevant

Question 74. Is the reporting frequency of the data required under Annex IV of the AIFMR appropriate?

- Yes
- No
- Don't know / no opinion / not relevant

Question 75. Which data fields should be included in a template requiring AIFMs to provide ad hoc information in accordance with Article 24(5) of the AIFMD during the period of the stressed market in a harmonised and proportionate way?

Please explain your answer presenting the costs, benefits and disadvantages of implementing the suggestions:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 76. Should supervisory reporting for UCITS funds be introduced?

- Yes
- No
- Don't know / no opinion / not relevant

Question 76.1 Please explain your answer to question 78, also in terms of costs, benefits and disadvantages:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 77. Should the supervisory reporting requirements for UCITS and AIFs be harmonised?

- Yes
- No
- Don't know / no opinion / not relevant

Question 77.1 Please explain your answer to question 79, also in terms of costs, benefits and disadvantages:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The UCITS directive imposes far stricter requirements on the fund management, investment risk and investor protection than AIFMD. Therefore, we do not believe it is necessary to applying the more extensive supervisory requirements for AIFs to UCITS.

Question 78. Should the formats and definitions be harmonised with other reporting regimes (e.g. for derivatives and repos, that the AIF could report using a straightforward transformation of the data that they already have to report under EMIR or SFTR)?

- Yes
- No
- Don't know / no opinion / not relevant

c) leverage

Question 79. Are the leverage calculation methods – gross and commitment – as provided in AIFMR appropriate?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 79.1 Please explain your answer to question 79 in terms of the costs, benefits and disadvantages:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We believe the leverage calculation methods, gross and commitment, provided in AIFMR are appropriate and workable and that therefore no further adjustments are needed.

Question 80. Should the leverage calculation methods for UCITS and AIFs be harmonised?

- Yes
- No
- Don't know / no opinion / not relevant

Question 80.1 Please explain your answer to question 80:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We do not believe there is any need to harmonise the leverage measures used in UCITS and AIFMD. The methodologies are used for different purposes across these directives, and attempting to harmonise them could have unintended and undesirable outcomes e.g. limiting the ability of UCITS to manage portfolio risks through the use of hedging instruments.

Question 81. What is your assessment of the two-step approach as suggested by International Organisation of Securities Commissions ('IOSCO') in the [Framework Assessing Leverage in Investment Funds published in December 2019](#) to collect data on the asset by asset class to assess leverage in AIFs?

Please provide it, presenting costs, benefits and disadvantages of implementing the IOSCO approach:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The two-stage process envisaged in the IOSCO recommendations with respect to a framework for monitoring leverage in investment funds that may pose financial stability risks is already reflected in the recently published ESMA guidelines for Article 25 of AIFMD, and indeed for Step 1, the new ESMA guidelines go beyond the IOSCO recommendations. In our view, the new ESMA guidelines for Article 25 of AIFMD effectively implement the IOSCO recommendations.

Question 82. Should the leverage calculation metrics be harmonised at EU level?

- Yes
- No
- Don't know / no opinion / not relevant

Question 82.1 Please explain your answer to question 82, presenting the costs, benefits and disadvantages of your chosen approach:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Leverage is defined differently in different directives as a result of the specific regulatory purposes of each. Therefore, we do not believe that harmonisation of leverage calculation metrics at the EU level would result in any significant benefits.

Question 83. What additional measures may be required given the reported increase in CLO and leveraged loans in the financial system and the risks those may present to macro-prudential stability?

Please provide your suggestion(s) including information, where available, on the costs and benefits, advantages and disadvantages of the proposed measures:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 84. Are the current AIFMD rules permitting NCAs to cap the use of leverage appropriate?

- Yes
- No
- Don't know / no opinion / not relevant

Question 85. Should the requirements for loan originating AIFs be harmonised at EU level?

- Yes
- No
- Don't know / no opinion / not relevant

Question 85.1 Please explain your answer to question 85:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The Member State rules, setting the requirements for loan originating AIFs, are adequate and workable and that they do not need to be harmonised at the EU level. The purpose of AIFMD is to regulate AIFMs and is not the place for product-level regulations.

V. Investing in private companies

The AIFMD rules regulating investing in private companies aim to increase transparency and accountability of collective investment funds holding controlling stakes in non-listed companies. This section seeks insights whether these provisions are delivering on the stated objectives and whether there are other ways to achieve those objectives more efficiently and effectively. Private equity industry has been growing for years from a few boutique firms to € 3,7 T global industry. The questions are raised therefore whether the AIFMD contains all the relevant regulatory elements that are fit for purpose.

Question 86. Are the rules provided in Section 2 of Chapter 5 of the AIFMD laying down the obligations for AIFMs managing AIFs, which acquire control of non-listed companies and issuers, adequate, proportionate and effective in enhancing transparency regarding the employees of the portfolio company and the AIF investors?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 86.1 Please explain your answer to question 86, providing concrete examples and data, where available:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 87. Are the AIFMD rules provided in Section 2 of Chapter 5 of the AIFMD whereby the AIFM of an AIF, which acquires control over a non-listed company, is required to provide the NCA of its home Member State with information on the financing of the acquisition necessary, adequate and proportionate?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 87.1 Please explain your answer to question 87, providing concrete examples and data, where available:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 88. Are the AIFMD provisions against asset stripping in the case of an acquired control over a non-listed company or an issuer necessary, effective and proportionate?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 88.1 Please explain your answer to question 88, providing concrete examples and data, where available:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 89. How can the AIFMD provisions against asset stripping in the case of an acquired control over a non-listed company or an issuer be improved ?

Please provide your suggestion(s) including information, where available, on the costs and benefits, advantages and disadvantages of the proposed measures:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

VI. Sustainability/ESG

Integrating sustainability factors in the portfolio selection and management has a double materiality perspective, in line with the [non-financial reporting directive \(2014/95\)](#) and the [European Commission's 2017 non-binding guidelines on non-financial](#). Financial materiality refers in a broad sense to the financial value and performance of an investment. In this context, sustainability risks refer to potential environmental, social or governance events or conditions that if occurring could cause a negative material impact on the value of the investment. For example, physical risks from the consequences of climate change may concern a single investment/company, e.g. due to potential supply chain

disruptions or scarcity of raw materials, and may concern welfare losses for the economy as a whole. Non-financial materiality, also known as environmental and social materiality, refers to the impacts of an investment/corporate activity on the environment and society (i.e. negative externalities). Still, there is also a financial dimension to non-financial materiality. Notably, so-called transition risks arise from an insufficient consideration for environmental materiality, for instance due to potential policy changes for mitigating climate change (e.g. to regulatory frameworks, incentive structures, carbon pricing), shifts of supply chains and end-demand, as well as stakeholder actions for mitigating climate change.

The [disclosure regulation 2019/2088](#) requires a significant part of the financial services market, including AIFMs, to integrate in their processes, including in their due diligence processes, assessment of all relevant sustainability risks that might have a material negative impact on the financial return of an investment or advice. However, at the moment AIFMs are not required to integrate the quantification of sustainability risks. Regulatory technical standards under the disclosure regulation 2019/2088 will specify principal adverse impacts to be quantified or described. This section seeks to gather input permitting better understand and assess the appropriateness of the AIFMD rules in assessing the sustainability risks.

Question 90. The [disclosure regulation 2019/2088](#) defines sustainability risks, and allows their disclosures either in quantitative or qualitative terms.

Should AIFMs only quantify such risks?

- Yes
- No
- Don't know / no opinion / not relevant

Question 90.1 Please substantiate your answer to question 90, also in terms of benefits, disadvantages and costs as well as in terms of available data:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

AIFMD should not be more restrictive than the SFDR; AIFMs should have the choice to give quantitative or qualitative response. There should be a level playing field across all institutions and there should not be any different requirements for AIFMs in relation to the disclosure of sustainability risks.

However, we would welcome ESMA guidance on the application of SFDR for AIFMs.

Question 91. Should investment decision processes of any AIFM integrate the assessment of non-financial materiality, i.e. potential principal adverse sustainability impacts?

- Yes
-

No

- Don't know / no opinion / not relevant

Question 91.1 Please substantiate your answer to question 91, also in terms of benefits, disadvantages and costs. Please make a distinction between adverse impacts and principal adverse impacts and consider those types of adverse impacts for which data and methodologies are available as well as those where the competence is nascent or evolving:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We agree that AIFM should integrate the assessment of non-financial materiality in their investment decision process. However, we do not believe that additional provisions on this are required in AIFMD as these are included in SFDR. There should be a level playing field across all institutions and there should not be any different requirements for AIFMs in relation to integrating the assessment of non-financial materiality into the investment decision process.

Question 92. Should the adverse impacts on sustainability factors be integrated in the quantification of sustainability risks (see the example in the introduction)?

- Fully agree
- Somewhat agree
- Neutral
- Somewhat disagree
- Fully disagree
- Don't know / no opinion / not relevant

Question 92.1 Please explain your answer to question 92:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We agree that the adverse impacts on sustainability factors should be integrated in the quantification of sustainability risks by AIFM. However, we do not think that there should be any additional requirements in AIFMD for this as they are already included in SFDR. There should be a level playing field across all institutions and there should not be any different requirements for AIFMs when quantifying sustainability risks.

Question 93. Should AIFMs, when considering investment decisions, be required to take account of sustainability-related impacts beyond what is currently required by the EU law (such as environmental pollution and degradation, climate change, social impacts, human rights violations) alongside the interests and preferences of investors?

- Yes
- No
- No, ESMA's current competences and powers are sufficient
- Don't know / no opinion / not relevant

Question 94. The [EU Taxonomy Regulation 2020/852](#) provides a framework for identifying economic activities that are in fact sustainable in order to establish a common understanding for market participants and prevent green-washing. To qualify as sustainable, an activity needs to make a substantial contribution to one of six environmental objectives, do no significant harm to any of the other five, and meet certain social minimum standards. In your view, should the EU Taxonomy play a role when AIFMs are making investment decisions, in particular regarding sustainability factors?

- Yes
- No
- Don't know / no opinion / not relevant

Question 94.1 Please explain your answer to question 94:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

The EU Taxonomy Regulation should not play a role when AIFM's are making investment decisions. The EU Taxonomy is not designed for capturing sustainability risk.

Question 95. Should other sustainability-related requirements or international principles beyond those laid down in Regulation (EU) 2020/852 be considered by AIFMs when making investment decisions?

- Yes
- No
- Don't know / no opinion / not relevant

Question 95.1 Please explain your answer to question 95, describing sustainability-related requirements or international principles that you would propose to consider.

Please indicate, where possible, costs, advantages and disadvantages associated therewith:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

AIFMs will have to take other sustainability-related requirements or international principles into account when appropriate but we do not believe there is a need for this to be explicitly included in AIFMD.

VII. Miscellaneous

This section contains a few questions on the competences and powers of supervisory authorities. It also opens up the floor for any other comments of the stakeholders on the AIFMD related regulatory issues that are raised in the preceding sections. Respondents are invited to provide relevant data to support their remarks/proposals.

Question 96. Should ESMA be granted additional competences and powers beyond those already granted to them under the AIFMD?

Please select as many answers as you like

- entrusting ESMA with authorisation and supervision of all AIFMs
- entrusting ESMA with authorisation and supervision of non-EU AIFMs and AIFs
-

enhancing ESMA's powers in taking action against individual AIMFs and AIFs where their activities threaten integrity of the EU financial market or stability the financial system

- enhance ESMA's powers in getting information about national supervisory practices, including in relation to individual AIMF and AIFs
- no, there is no need to change competences and powers of ESMA
- other

Question 97. Should NCAs be granted additional powers and competences beyond those already granted to them under the AIFMD?

- Yes
- No
- Don't know / no opinion / not relevant
